AI-native builder with 10+ years across data, analytics, and AI, increasingly focused on building end-to-end AI products and software systems from 0→1. Founding member of AI in People Science with hands-on experience taking ambiguous problems from concept through prototype, AI orchestration, backend and data systems, and user facing applications. Builds with Python, TypeScript, APIs, LLMs, agentic workflows, and modern web frameworks, with an extensive independent portfolio of AI applications, hackathon projects, and rapid prototypes.

Experience

December 2025 - Present

Principal Behavioral Scientist – Gen AI (AI Solutions Engineering) at Target, Remote

- Build and own 0→1 AI products from ambiguous business requirements through technical design, data integration, AI orchestration, and user-facing delivery, including Skills Intelligence, Career Pathing, and Salary Benchmarking solutions.
- Built a Skills Intelligence Agent end-to-end by integrating Workday, Lightcast, and Standard Occupational Classification (SOC) data on the SkillsGPT foundation; delivered a Streamlit application incorporating Talent Management logic for organizational restructuring and workforce decisions.
- Built a Salary Benchmarking Agent integrating BetterComp with internal compensation data through a governed data pipeline, replacing a manual spreadsheet-driven workflow with an auditable AI application for compensation insights and decision support.
- Built an AI theming and sub theming solution for HR Shared Services transcripts using Python and LLM-based quality checks; created the supporting Power BI semantic model and DAX layer to transform unstructured data into reusable intelligence.
- Built an employment brand intelligence solution integrating external reviews and public commentary with internal workforce data using Python and Octoparse; applied AI classification and built the supporting semantic and reporting layer.

October 2022 – December 2025

Senior Manager, Data Science at Target, Remote

- Built SkillsGPT end-to-end, unifying Lightcast labor-market data, Workday job-profile data, and occupational classifications into a governed enterprise skills taxonomy and reusable foundation for AI-powered workforce intelligence.
- Built and deployed the Org Strategy Companion, an agentic AI copilot that automated recurring organizational analytics workflows and reduced manual analytics effort by 70%.
- Led a team of 5+ People Data Scientists while remaining hands-on across technical strategy, project scoping, solution development, prioritization, mentoring, and end-to-end delivery of workforce analytics and AI initiatives.
- Partnered with HR and Learning & Development stakeholders to translate complex workforce problems into scalable data and AI solutions supporting talent mobility and upskilling frameworks reaching 400,000+ employees.

June 2021 – October 2022

Lead Data Analyst at Target, Remote

- Translated workforce and site-level patterns into talent projections for a new GSCL building, supporting staffing and talent planning decisions.
- Analyzed cross-site and store application behavior to identify candidate preferences and recurring patterns in application and site-selection workflows.
- Reduced legacy SQL workflow processing time from 2 days to 2 hours by rebuilding and automating workflows as streamlined Python scripts.

February 2020 – June 2021

Senior Data Analyst – People Analytics (Research & Analysis) at Walmart, Bentonville, AR

- Applied statistical analysis, NLP, and workforce analytics to inform decisions affecting 1.2M+ associates across rehire, workforce composition, employee survey, and workforce-impact analyses.
- Built Power BI workforce analytics dashboards integrating data lakehouse across HQ, stores, and distribution-center personas.

May 2017 – January 2020

Sr. Business Analytics Specialist / Data Scientist at Wild Birds Unlimited, Inc., Carmel, IN

- Built end-to-end analytics solutions from data sources and databases through Power BI semantic models, DAX, dashboards, and reporting, modernizing fragmented workflows.
- Built sentiment analysis and Python-based time-series forecasting solutions that generated customer and business insights and helped drive 30% of traditional store owners to adopt social media marketing.

2010 – 2017

Earlier Career at Indiana University School of Medicine; Colgate-Palmolive

- Reduced MRI data-mining processing by 70% using Python and Unix and automated data-warehouse workflows with Unix shell scripting, eliminating manual processing and saving the equivalent of one full-time resource.

INDEPENDENT AI PORTFOLIO

(Few highlighted projects from <https://www.shreyachakrabarti.ai/>)

- Community Pilot - Built a multi-agent system for food donation matching and volunteer dispatch using Vapi, OpenAI, FastAPI, and Supabase.
- DataPilot AI - Built an enterprise data discovery platform for documentation, lineage, metadata, and intelligent data assistance using Next.js, TypeScript, and OpenAI.

Education

2015-2017

MS, Computer Science, Purdue University

2009-2010

BE, Electronics & Communications Engineering, Ramarao Adik Institute of Technology
